

SiteSeer3D for Tourism Businesses

1.0 Introduction

We have just launched SiteSeer3D for tourism, a new 3D virtual tourism system for the State of Idaho that will enhance tourism websites throughout the State with 3D mapping. This is a full, interactive 3D application so that visitors to your website can appreciate the beauty of the State and the location and amenities of your business as if they are flying around in a hot air balloon.

The heart of this system is on-line collaboration that generates content for the State's tourism portal, VisitIdaho.org and your business website. The State of Idaho has assembled vast amounts of information that is now available for your website to market your business:

- 30,000 points of interest
- 1,600 campgrounds and parks
- 17,000 miles of hiking and biking trails
- 6,000 miles of snowmobiling trails
- 400 boating sites and much more

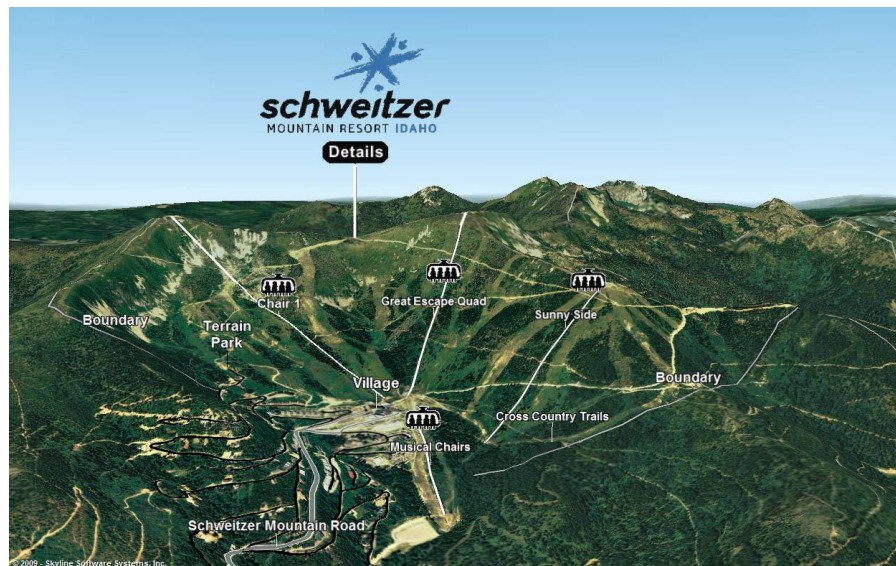

You will be able to manage the information about your business that appears on VisitIdaho.org:

- your location
- your logo
- the link to your website
- your amenities

SiteSeer3D is the first system

to automate this exchange of information and to provide the capability to manage content about your business on the State's 3D website. In fact, SiteSeer3D allows you to exchange content with any SiteSeer3D website you choose.

Visitors to your website will appreciate access to the State's recreational content, 3D address locator, 3D directions and live traffic and weather as well as your property specific information.

2.0 Free Trial

For a limited time, we are offering a free trial that will allow you to test SiteSeer3D for 90 days. This free trial will provide:

- the ability to highlight content about your business on VisitIdaho.org (and other SiteSeer3D websites) as well as add a link to your website
- a 3D map of your business and amenities for your website including State recreation information

We have pulled in information from the Department of Tourism for most businesses that are already registered with the State. In order to register for the free trial, find your business name in the attached document and then click on the registration link. You will be able to change any information pertaining to your business.

If your business does not show up in the list, go to www.SiteSeer3D.com, select “Free 90 Day Trial” and follow the instructions to brand, build and publish your SiteSeer3D website to your existing website.

3.0 How to Purchase the SiteSeer3D

There is no need to purchase SiteSeer3D at this time. Just register for the trial and you will be notified to license the system before your trial expires. The cost of the system is just \$9.95 a month for 12 months or \$99 pre-paid for a year. This will entitle you to:

- the ability to highlight content about your business on VisitIdaho.org (and other SiteSeer3D websites) as well as add a link to your existing website
- a 3D map of your business for your website including State recreation information

If you have any questions, visit www.SiteSeer3D.com or feel free to contact GeoData Technologies at info@geodatatechnologies.com or call us at (208) 255-7215.

Regards,
Mark
